Basic Electronics Questions for Interviews and Answers

Power engineering is a sub division of electrical engineering. It deals with generation, transmission and distribution of energy in electrical form. Design of all power equipments also comes under power engineering. Power engineers may work on the design and maintenance of the power grid i.e. called on grid systems and they might work on off grid systems that are not connected to the system.

This current varying in parallel circuits brought about Kirchoff's next big law in basic electrical engineering, Kirchoff's Current Law (KCL). This law basically states that current into a node will equal the current out of the node. In other words, the net current in a node is zero or $0 = I(\text{in}) - I(\text{out})$. Looking at the node (connection between two loops) in the diagram below, we already ...
