Review: Germs: Biological Weapons and America's Secret War ...

Biological Warfare in the U.S. Biological warfare, or “germ warfare,” is the “use of biological toxins or infectious agents (bacteria, viruses, and fungi) with the intent to kill or incapacitate humans.” Historically, the United States’ involvement in bacterial weaponry has been driven by competition and paranoia.

How the U.S. Government Tested Biological Warfare on America

History Early history (1918-41) The United States biological weapons program officially began in spring 1943 on orders from U.S. President Franklin Roosevelt. Research continued following World War II as the U.S. built up a large stockpile of biological agents and weapons. Over the course of its 27-year history, the program weaponized and stockpiled the following seven bio-agents (and pursued ...
