Starting with the Windows 10 May 2019 Update (version 1903), reinstalling Windows 10 using installation media while choosing to 'Keep nothing' (a clean install) will automatically enable reserved storage if the partition you reinstall Windows to is 20GB or larger. Reserved storage sets aside disk space to be used by updates, apps, temporary files, and system caches, thus improving the day-to-day function of your PC by ensuring that critical OS functions always have access to disk space.

Reinstall Windows 10 - Windows Help

By starting over with a clean copy of the operating system, you can remove bloatware, wipe out malware, and fix other system problems. A full, clean reinstall is different from the Reset your PC option in Windows 10 and 8, or a manufacturer's recovery partition or disk for Windows 7.
